

59th Street and 11th Avenue Entrance

**John Jay College of Criminal Justice** is a community of individuals committed to the exploration of justice in all its many dimensions. The College's liberal arts curriculum equips students to pursue advanced study and rewarding careers in the public, private, and non-profit sectors. Through their studies and research, John Jay students are prepared for ethical leadership, global citizenship, and engaged service. The faculty members encourage students to pursue transformative scholarship, while also engaging in advanced research that improves knowledge, informs practices, and sustains just societies.

Having the undergraduate cybersecurity program designated as a CAE-CD signifies that John Jay as a whole has a strong cybersecurity posture and is a leader in cybersecurity education. It underscores the College's ability to meet the increasing demands of academic criteria that serves our nation in the

protection of national information. It means that John Jay has been educating the next generation of highly skilled experts who will defend America's cyberspace.

Cybersecurity is embedded in multiple programs throughout the College and is holistically taught and interconnected through many majors at the College. Our hands-on and project-based curriculum style prepares students for the industry and they can hit the ground running. Graduates of our cybersecurity programs go on to work within the public and private sector, including in the NYPD, New York City and state government, and federal government agencies.

Everything at John Jay is taught through a justice-focused lens, including cybersecurity. When a student who has learned about justice—and all the ideals that this country was founded on—enters an office, they are more than prepared for the work; they are also acutely aware of concepts of fairness and equality.
