

Welcome to Chipola College

Founded in 1947, **Chipola College** is governed by a local Board of Trustees and is committed to delivering quality, affordable, and accessible educational opportunities through a variety of delivery methods. As a proud member of the Florida College System, Chipola offers baccalaureate and associate degrees, workforce certificates, business and industry training, community outreach, and cultural enrichment programs for both students and the broader community.

Chipola College provides over 40 degree and certificate programs designed to prepare students for the workforce and meet the evolving needs of today's employers. Dedicated Chipola Advisors work closely with students to develop clear academic plans, ensuring they enroll in the right courses to achieve their educational and career goals. To accommodate the diverse needs of students—

including those who are employed, commute, or have family responsibilities—the college offers flexible scheduling with face-to-face, evening, and online classes.

Chipola became a National Center of Academic Excellence (CAE) in Cybersecurity in 2025. A standout feature of Chipola's School of Business and Technology is the addition of a state-of-the-art Cyber Range to its Computer Science Program. This advanced facility provides a virtual environment where students can engage in sophisticated cyber warfare simulations, gaining hands-on experience that prepares them for careers with organizations such as the NSA, FBI, Homeland Security, CIA, and leading private technology companies.

Graduates of Chipola College's cyber programs are well-prepared to enter the workforce directly or continue their education at prestigious institutions such as Florida State University and the University of Florida. Career opportunities for graduates include network support technician, cybersecurity specialist, network administrator, network security personnel, and digital forensic technician.
