SAINT PETER'S UNIVERSITY

Where Peacocks Soar

The Bachelor of Science in Computer Science with a Cyber Security concentration at **Saint Peter's University** prepares students to become highly skilled professionals capable of defending digital infrastructure in an increasingly interconnected world. Our mission is to educate future leaders in computing who combine technical expertise with ethical judgment, guided by the Jesuit values of service, integrity, and social responsibility.

This concentration provides students with a strong foundation in computer science while offering specialized knowledge in areas such as network security, ethical hacking, digital forensics, and cyber defense strategies. What makes the program unique is its integration of real-world challenges with a values-based education, emphasizing both technical excellence and responsible decision-making.

Located in Jersey City, students benefit from access to top cybersecurity firms, government agencies, and financial institutions. Our small class sizes, experienced faculty, and hands-on labs ensure a personalized and immersive learning experience. Internships, undergraduate research, and industry partnerships enhance career readiness.

Graduates are prepared for roles such as security analyst, penetration tester, and systems security administrator; or to pursue advanced studies. Our program empowers students to become protectors of data, systems, and people in a digital age.
