

University of Nevada, Reno Campus

The **University of Nevada, Reno** located in the heart of Reno, Nevada is a Carnegie R1, Tier1 institution and the flagship public university of the State of Nevada. The University of Nevada, Reno has been highly instrumental in interdisciplinary cybersecurity education and research since the establishment of the university-wide Cybersecurity Center in 2014.

Our mission is to master the challenge of cybersecurity by bringing together cross-disciplinary teams to work in synchrony, examining each problem through disciplinary lenses and seeking solutions that incorporate societal, technical, ethical, political, and economic considerations. Currently, twenty-five faculty from nine disciplines (Computer Science & Engineering, Electrical & Biomedical Engineering, Criminal Justice, Political Science, Psychology, History, Information Systems, Journalism and Public Health) are affiliated with the Center as active participants

in cybersecurity research, education, and outreach. The Cybersecurity Center provides educational and research opportunities for both undergraduate and graduate students that prepare them to pursue careers in cybersecurity and related fields.

The UNR Cybersecurity Center plays an active role in the placement of students in federal, state, and local government organizations as well as the high-tech industries in the near-by Silicon Valley and the expanding Northern Nevada technical industries. The Center is actively engaged with its student population and encourages them to participate in a broad range of cybersecurity-related activities in addition to education and research. Over the recent years, the Nevada Cyber Club (student Cyber club at University of Nevada, Reno) has become one of the top collegiate cybersecurity competition teams at the national level.
