Wentworth Institute of Technology Campus

Wentworth Institute of Technology's Cybersecurity program is dedicated to developing highly skilled, practically-minded cybersecurity professionals ready to tackle evolving global threats. Our mission focuses on providing hands-on, real-world experience, fostering critical thinking, and instilling ethical responsibility to protect digital assets and infrastructure.

What makes our program unique is its robust, application-focused curriculum, enhanced by a mandatory co-op program. Students gain invaluable industry experience through two required co-op semesters, applying classroom knowledge to real cybersecurity challenges with leading organizations. This distinguishes our graduates, making them job-ready upon commencement. Furthermore, Wentworth has earned the prestigious National Center of Academic Excellence in Cyber Defense (CAE-CD) designation from the NSA and DHS, certifying the rigor and quality of our curriculum and opening doors to exclusive federal opportunities and scholarships. Our dedicated Cybersecurity and Forensics Lab provides cutting-edge tools for defensive and offensive security training, incident response, and forensics.

Wentworth Institute of Technology itself is a highlight. Located in Boston, a hub of innovation, it offers a vibrant campus experience. The university boasts a strong career focus, with 93% of the Class of 2023 employed or in graduate school within six months of graduation, and 98% working in their field. Wentworth's commitment to practical learning and its strong industry connections ensure graduates are well-prepared for impactful careers.
